### IV. Evaluation

| Issues, Concerns, and Problems Encountered  | Actions Taken   |
|---|---|
| 1. The seminar took a while to get fully set up due to limited attendees up until almost an hour after the venue was set. | Sheer determination, passion, and will to finish the whole project. |

### VI. Other comments or suggestions:

The Biology Society highly recommends that more work to gather more attendees be a priority to expand the range and effectivity of projects such as this, as they will dictate the course of Laguna Lake's future. Volunteers that have the sheer dedication, passion, and will must also be chosen for the reason that maintaining and cleaning Laguna Lake is not for the faint of heart; we underwent through this project for the purpose of volunteerism and spreading awareness, it was not for the sake of a good time nor for a vacation.
